

Would you join a free social/market network if ...

1) Would you join a free social/market network If the following is their Privacy Policy?

You own your personal information and content. It is explicitly not ours.

You will never receive a targeted advertisement or 3rd party content based on what you do or say online. We think it is unethical.

You see every post in timeline order from your friends, family and groups.

We do not manipulate, filter or change the order of your content or what you see.

Permissions and privacy are your rights. You control them.

You control who can access your content.

You control what, if anything, others can see in member searches.

We're a private network. That means we do not track or profile you.

Your privacy means that we do not share your personal information with anyone.

Your 'likes' and 'loves' are for you and your friends. We do not monitor or mine your data.

Your face is your business. We do not use facial recognition technology.

You have the right to delete your account and take your content with you at any time.

We do not store or archive our logs.

When you join this social/network and for any reason do not like it, you can delete your account. Be forewarned, if you delete your account there is no getting it back. We do not archive your information.

2) Would you join a free social/market network if there are 4 levels of security tied into your digital wallet?

			
<p>The Markethive wallet is a software program that stores private and public keys and interacts with various blockchains to enable users to send and receive digital currency and monitor their balance, with the additional options to send payments through the messaging system. The wallet also receives Markethive auto revenue payments.</p>	<p>The initial subscription into Markethive requires a mature social network and a cell number is the second level of verification. But further verification is required to conduct business. This is where the 2FA process requires documents that when approved, they are encrypted, and the Wallet becomes the only point giving the subscriber the only access to their own privacy</p>	<p>Security blockchain end to end, private key for verification access to the Markethive platform. KYC documentation is stored in the blockchain and only accessed via your wallet with the wallets 2FA. Upon logging into Markethive, the wallet delivers several layers of protection.</p>	<p>Decentralized messenger, p2p, blockchain, voice, text, 3+ call ways, groups and channels, built in white board and desktop share webinar. Encrypted, private, crypto coin transfers, shapeshifter, runs from wallet. Pays to use it. Reads and publishes to the Markethive Newsfeed.</p>

3) Would you join a free social/market network if there is a simple model to evaluate digital money viability?

The above image shows a simple model for evaluating if our digital money is viable. The Three Pillars Community, Technology and Liquidity must each be as strong as the other.

- A. There must be a community involved. Markethive has that and it is growing every day. Our Alexa Ranking decreases every day, which means there is more and more traffic to the website.
- B. Markethive has tools that was discussed above. Soon we will be on the Blockchain, with our own Wallet. Micro-payments will be possible, an Airdrop will be implemented and more.
- C. Finally, there is Liquidity. We will have our own Exchange which will make it easy to exchange our coin. The coin will be used inside Markethive. There will be Market Makers that will assure the coin can be traded all of the time.

Markethive fits the qualifications for being a viable coin.

4) Would you join a free social/market network if there are free built-in marketing tools?

Content Marketing

An Autoresponder with full configuration, control and is not limited!

Link to the Autoresponder Video <https://youtu.be/ofPNml4JHOM>

Groups

Campaigns

Conference Rooms

Leads Funnels

Lead Management

Marketplace

Social Media

SEO

5) Would you join a free social/market network if you get paid for participating.

Automated Marketing was invented by Thomas Prendergast in 1994 and evolved into what was known for 20 years as Veretek. A system integrated into marketing teams, later to be known as Social Networks.

Today Veretek has been replaced by Markethive. The most advanced Inbound Marketing platform.

Markethive is also a powerful and growing Market Network born from and for entrepreneurs.

The entire system is free

Revenue is driven by subscriptions, mining, coin exchanges, services platforms, media platforms, etc. (we call money machines) allowing us to deliver a universal income for active entrepreneurs within the ecosystem as a share of the profits.

Markethive's blockchain has its own crypto coin, its own coin exchange, its own wallet integrated with a fully encrypted Telegram/Skype like messaging and webinar platform system, a KYC verification module and a secured 2FA login protocol for Markethive access.

Markethive is also launching an infinity Airdrop, whereas, our first drop will be 500 coins for everyone already in the system, then offering 500 coins for every new subscriber. There after amount of coin in subsequent Airdrops will decrease, but remain in force.

The Entrepreneur upgrade receives 100% matching coins for all new subscribers who register through them.

The magnitude of this service eclipses all competitors including LinkedIn and Facebook.

There are 4 ways that you can earn income as a Free Member of Markethive.

1. Markethive will have an **Infinity Airdrop**. The first drop will give away 500 Markethive Crypto Coins for everyone already in the system and every new subscriber will receive 500 Markethive coins. Thereafter, as the Markethive coin increases in value, the amount of coins given away will decrease, but the Airdrop will remain in force.

2. The first thing someone will want to do, when they join, is complete the **System Tutorials**. When you complete a section, you will receive a Micro Payment in Markethive Coin. This will go directly into your wallet, that we talked about in earlier in the article.
 3. Another way to earn income is through micro payments. *You will have to refer 3 people who are verified, to get paid micro payments for everything you do in the system.* You create a post, you get paid. You create a group, you get paid. You give a comment, you get paid. You fill out your Profile, you get paid. You get the idea!
 4. Markethive will be doing away with the Like Button. It will be replaced with a Tip Jar Button. If someone thinks that article you wrote was good they will be able to Tip you with Markethive coin.

6) Would you join a free social/market network if there is an optional upgrade and 14 more ways to earn more income?

Entrepreneur Upgrade

Automated Marketing was invented by Thomas Prendergast in 1994 and evolved into what was known for 20 years as Veretekk. A system integrated into marketing teams, later to be known as Social Networks.

Today Veretekk has been replaced by Markethive. The most advanced Inbound Marketing platform.

Markethive is also a powerful and growing Market Network born from and for entrepreneurs.

The entire system is free

Revenue is driven by subscriptions, mining, coin exchanges, services platforms, media platforms, etc. (we call money machines) allowing us to deliver a universal income for active entrepreneurs within the ecosystem as a share of the profits.

Markethive's blockchain has it's own crypto coin, its own coin exchange, its own wallet integrated with a fully encrypted Telegram|Skype like messaging and webinar platform system, a KYC verification module and a secured 2FA login protocol for Markethive access.

Markethive is also launching an infinity Airdrop, whereas, our first drop will be 500 coins for everyone already in the system, then offering 500 coins for every new subscriber. There after amount of coin in subsequent Airdrops will decrease, but remain in force.

The Entrepreneur upgrade receives 100% matching coins for all new subscribers who register through them.

The magnitude of this service eclipses all competitors including LinkedIn and Facebook.

5. When you upgrade to Entrepreneur and someone joins using your link, they will get 500 free crypto coins and you will get a matching bonus of the same amount of free coins.

6. Advertising Marketing Co-op Rotator. Your share of new associates signing up through Markethive Advertising campaigns.

7-16. Entrepreneurs will each get their own Portals where they can set their own prices for the services.

Portals like:

Big Caboodle (a website maker)

Press Release website

Hiveroom (conference rooms)

Bee Lancer (services website)

Markethive Exchange (Cryptocurrency Exchange)

AboutBitco.in (Crypto News Website) and many more.

As an Entrepreneur we can sell the services that each Portal provides and charge whatever we want.

17. Exclusive free Banner advertising through-out the system and traffic portals. 3 sizes in top positions in well-traveled areas.

18. Exclusive self-replicated ICO like ILP (Initial Loan Procurement)
Markethive.io investment site where new investors are coded to you earning additional ILP notes shares. When someone purchases an ILP, through your link, you will then get shadow shares in the same amount. The Shadow shares become active when ILP's are funded.

19. The Entrepreneur Upgrade is \$100 per month or \$1000 per year if paid by the Year. If you do not miss a payment for 12 consecutive months, you will be given a 1/10 ILP shadow share. If you do not miss a payment for 10 years you will have earned a full ILP and its benefits. You will get your money back each year. This option is only available to 1000 Entrepreneurs.

I leave you with the original question.

Would you join a free social/market network if...
